Wellingborough, UK | +44 7935 165734 | innessyk@gmail.com

[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL PROFILE

BSc (Hons) Computing – Graduation Expected 2026 with experience in software development, database systems, cloud technologies and systems analysis. Developed full-stack applications, database solutions and cloud architecture projects through academic and independent work. Seeking a graduate or junior technology role to apply technical, analytical and problem-solving skills while continuing professional development.

TECHNICAL SKILLS

Programming: Java, JavaScript, PHP, SQL, HTML5, CSS3

Web Development: React, Spring Boot, REST APIs, Full-Stack Development

Databases: MySQL, Database Design, EER Modelling, SQL Views, Stored Procedures, Triggers, Data Normalisation

Cloud & Tools: Microsoft Azure, GitHub, Visual Studio Code, Visual Studio, Lucidchart, Draw.io

Methods: Agile, UML, DFDs, Requirements Engineering, Systems Analysis

PROJECTS

Sustainable Nutrition Recommendation System | React, Spring Boot, Java, MySQL, Python

- Engineered a full-stack decision-support application integrating over 1,000 recipes and sustainability metrics to support meal-planning recommendations.
- Implemented REST APIs, database integration and cloud deployment using React, Spring Boot and MySQL.

Passport to Paradise Travel Challenge System | PHP, JavaScript, MySQL

- Built a full-stack travel challenge application featuring 4 progression tiers, leaderboard functionality, CRUD administration and relational database integration.
- Deployed a live public application and maintained a public GitHub repository.

Vehicle Marketplace Database System | MySQL

- Designed and implemented a fully normalised relational database solution featuring EER modelling, SQL views, stored procedures and triggers.
- Applied business rules, relational integrity constraints and database design best practices.

Azure Fleet Management Cloud Architecture | Microsoft Azure

- Developed a scalable cloud architecture using Azure networking, VM Scale Sets, Load Balancers, PostgreSQL and security controls.
- Applied cloud security, scalability, monitoring and high-availability principles to support a resilient and fault-tolerant Azure architecture.

EDUCATION

BSc (Hons) Computing | Graduation Expected 2026
Arden University | 2022–2026

Key areas: Software Development, Databases, Cloud Computing, Systems Analysis, Data Analysis, Object-Oriented Programming.

Bachelor of Law
Alec Russo State University of Balti, Moldova

Diploma in Automated Systems in Rail Transport
Railway Technical College, Moldova

PROFESSIONAL EXPERIENCE

Process Controller | Bakkavor Ltd | 2017 – 2022

- Supervised teams of 6–12 employees, monitored production KPIs and quality standards, prepared operational reports and trained new staff across multiple production lines.

Warehouse Operative (Part-Time) | 2023

- Co-ordinated warehouse activities including stock handling, order processing and inventory control within a fast-paced distribution environment.

Packing Operative | Bakkavor Ltd | 2016 – 2017

- Maintained production, quality and food safety standards within a high-volume food manufacturing environment, ensuring compliance with operational procedures.

Owner & Operator – EleganceFashion | 2013 – 2016

- Managed an online fashion retail business, including website administration, marketing and customer service.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- IEUK Technology on Demand – Technology and project management experience
- IEUK Technology & Engineering – Virtual industry experience
- Couch to Coder – Web development and programming fundamentals
- Bright Network Virtual Work Experience – Professional and employability development
